

DEV 16

PVA / Emulsion Adhesive Cleaner

Description

DEV 16 is a concentrated water based cleaner developed to quickly break down all cold adhesives and starch which builds up within lines and systems.

Additionally **DEV 16** can be used as a wash down cleaner on glue / starch application rollers and mixing tanks.

DEV 16 is available in 5L bulk containers.

Benefits

Powerful

The unique formulation of **DEV 16** enables users to circulate the product through the whole pumping system which in turn, will give a deep cleaning action to glue lines, spray valves, etc.

Superior Benefits

DEV 16 may also be used to clean roller systems, pallets and shafts within the bottling / labelling industry.

DEV 16 will quickly penetrate and breakdown cured starch which accumulates around plant and equipment.

Safe to Use

DEV 16 is non-toxic, non-flammable and completely biodegradable.

Easy to Use

Add **DEV 16** to hot or cold water (preferably hot) at a dilution of 1:4 parts water and circulate through the system. Alternatively, use at the above dilution to wash areas clean. Easy to follow instructions on every pack.
