

GARD EV60

Hot Melt Cleaner

Description

GARD EV60 is a new liquid formulation developed to quickly and easily remove heavier contamination of hot melt adhesive from machinery and components, throughout the bottling, food and packaging industries.

GARD EV60 is available in 5L bulk container and 750ml spray bottles.

Areas of Use

GARD EV60 can be used to clean down label stations, guide rails, applicator wheels, label carriages, label brushes, belts and machine guards without causing any damage to plastic (ie: crazing / clouding).

Benefits

Safer

GARD EV60 unique formulation is non-flammable and non-corrosive.

Odourless

GARD EV60 is extremely low odour in use, which means the risk of tainting is completely ELIMINATED.

Powerful

GARD EV60 immediately penetrates and dissolves all hot melt glue leaving machinery and surfaces free from adhesive deposits.

Easy to Use

Simply apply **GARD EV60** with a clean cloth to the contaminated areas and wipe clean. Easy to follow instructions are on every pack.
